Thank you!

Thank you for choosing InfoDepot™ 2.0, the long awaited, much anticipated upgrade to our award-winning Fair Witness®. Through the combined efforts of Chena Software, Apple Computer, several other third-party developers, and many, many of our customers, InfoDepot 2.0 has grown to become the most innovative and versatile planning and project management software available today.

Thank you also for your patience and support as we worked to complete this 24 month re-engineering effort. I apologize for the extra months it took to complete version 2.0. We hope the time will be understandable when you see and use the vast number of features you won't find integrated into any other product.

Discover the new-look palettes, the form view, the enhanced timeline, and the calendar. Work more easily the new layouts, pop-up lists, formulas, and style sheets. Play with the dynamic new chalk tool and the special effects for paint. Share your work using the multi-user capabilities. And grab a bit of the future with unmatched support for new Macintosh technologies like Apple Script, PowerTalk, digital signatures, drag-and-drop, and built-in connections to other major applications.

Again, thank you for your patience during the upgrade effort and for using InfoDepot 2.0. Call us at 610-770-1210 if there is any way we can help you (or with suggestions for version 3.0!). So get to work and have fun exploring the new and exciting ways InfoDepot can make your projects and your job easier.

Sincerely,

Jim Kaslik

P.S. Call us to request a FREE PowerPC upgrade!
