Printing Your Designs

It's a good idea to print out a test page in color (using your own paper) to make sure the printer is connected properly and that the ink cartridges are working well. In most cases, the plain paper and normal quality settings should work well. Check your printer user's manual for more information on media and print quality settings available.

Follow the instructions in the software for loading the paper. Adjust the paper guides to make sure the paper feeds in straight. It may be difficult for the printer to pick up the paper when there is only one sheet of paper loaded—be patient and gently guide the paper into the printer if necessary. If your printer has a paper thickness setting, set it for "envelope" or thick paper mode.

Assembling Instructions

Helpful Tips

- You can use the cold peel paper on any cotton or cotton poly blend fabric.
- The ironing surface should be formica or any smooth, hard non-porous surface (other than glass). Don't use an ironing board!
- Total ironing time is approximately 3 1/2 minutes. Always make sure to use very firm pressure and to keep the iron moving constantly.

Preparing your image

Use scissors to carefully trim around the image, coming as close to the printed area as possible.

Ironing Instructions

CAUTION! Adult supervision is recommended for the ironing process.

1 Pre-heat your iron on the "highest" dry setting. Allow at least 8 minutes for the iron to heat up.

2 Place the garment onto a **wrinkle-free** pillowcase, making sure to center the area of the garment which will receive the printed transfer over the pillowcase.

3 Center the transfer, printed side DOWN onto the garment.

4 Place the iron over both edges of the transfer to set the transfer into place.

5 Starting from one edge, push the iron slowly along the long side of the transfer for at least 30 seconds using firm body pressure. Be certain that the iron overlaps ALL edges of the transfer.

6 Reposition the iron over both edges of the transfer beginning in the opposite corner and repeat step number 5.

7 Repeat the ironing steps above.

8 Immediately reheat the entire surface by moving the iron in a circular motion over the transfer (for approximately 1 1/2 minutes). Be sure that the flat bottom of the iron

covers the entire surface of the transfer, paying special attention to all edges
and corners.

Put the iron aside and wait **one minute before peeling.** Peel the transfer from the fabric,
beginning with a corner and using firm, steady pressure.

Washing Instructions

- Use cold water only.
- Set the washer to a low water level.
- Use detergent with color protection.
- Place the garment inside out into the washing machine.
- Dry in dryer under normal settings.
