The home Botanist

The Marie-Victorin Herbarium & Conservatory introduces the world of botany.

ATEMPORELLES

CD-ROM
MULTIMEDIA
E.M.M.E.
INTERACTIVE

A «virtual conservatory» with exquisite examples of plant life and detailed botanical information is the point of departure for a fascinating investigation into botany.

As you appreciate each specimen, take advantage of an interactive plant encyclopedia and a botany timeline.

For those who wish to deepen their knowledge of botany as a scientific field, two sections of the program address research and famous botanists.

For the home user, there is a special video section that teaches how to appreciate and preserve your favorite flowers.

Entertaining and informative, this CD-ROM will introduce you to the joys of learning about nature.

MINIMUM REQUIREMENTS:

MPC

PC 386, 486
Monitor VGA+
(640x480, 32000 colors)
Windows 3.1
CD-ROM drive

Sound Blaster or compatible sound card

MAC

Macintosh LCIII or superior
4 Mb RAM minimum
14" monitor
(640 x 480)
Hard disk with 5 Mo bytes
available space
CD-ROM drive

Installing and Running The Home Botanist

Insert the caddy into your CD-ROM drive with the disc facing upwards.

Open the Program Manager window if necessary. Choose Run from the File menu.

In the Command Line box, type the drive letter for your CD-ROM drive, a colon (:), and \setup.exe (for example, d:\setup.exe) and press enter.

Follow the instructions that appear on your screen.

This setup program creates the «HOME» group.

In this window you will see an icon for The Home Botanist and for any other E.M.M.E. products you own.

«The home botanist», an interactive multimedia program, © 1995 ACTA - EMME International rights secured. Do not duplicate. Not available for separate rental.
