

The Settlers II

VENI, VIDI, VICI

Mac™ version
of the popular game
that has sold almost
half a million copies!

"The fate of thousands is in your hands"

The Settlers II

VENI, VIDI, VICI

Continue your voyage of discovery over the seas.

Dispatch your tireless scouts to explore unknown territories.

Position your catapults and fight against churlish Vikings, Nubians and Asiatics.

Conquer your own personal kingdom and defend it against intruders!

The Settlers II – VENI, VIDI, VICI is a strategic economic simulation and is the successor to the Blue Byte bestseller "The Settlers" (also known as "Serf City").

After fighting a losing battle with the raging sea, a brave people find themselves stranded on an apparently uninhabited island; their ship destroyed. The brave band of survivors, whom we call the Romans, must rely on your help as they are challenged to the ultimate test-survival.

With your support, your subjects set up mines from which raw materials are extracted. They will conquer the seas and trade with remote islands. But you'll also have to get them going in farming, animal raising, hunting and fishing.

But, even the most well-meaning man cannot live in peace if the malicious neighbors won't let him. Watch out for churlish Vikings, hot-headed Nubians and technologically advanced Asiatics. Build your empire carefully and defend it swiftly. Offense may be the best defense, but be careful-the enemy isn't sleeping either...

Features

- ❖ Direct your animated subjects throughout your empire; thousands may be active on-screen simultaneously!
- ❖ Shipbuilders, hunters, butchers, soldiers, scouts and more are at your command!
- ❖ Zoom in and "follow" any one of your subjects as they perform their assigned tasks!
- ❖ Construct a fleet of ships to explore uncharted waters and supply provisions to new lands!
- ❖ Digitized speech, highly-detailed hand-painted graphics, online help and more!

"...a fun and engrossing experience..."

Macintosh™ Version

ADDENDUM TO THE MANUAL

Important Information!

ADDENDUM TO THE MANUAL

We have discovered a compatibility issue with a small percentage of Macintosh systems, in particular new PowerBooks. These systems may freeze immediately after launching giving you a distorted or blank screen.

The solution is to manually switch to 256 color mode prior to launching Settlers II. This will stop Settlers II from automatically changing color modes, which is the cause of the problem.

(Please note that this problem does not occur on most systems, and you should only be concerned if your particular system exhibits this behavior.)

If your system has this problem, follow these simple steps:

1. Go to your "Control Panels" folder located in your Apple Menu (in the upper left corner).
2. a) To change color modes on older Macintosh systems, enter the "Monitors" control panel and select "Colors" then "256".
b) To change color modes on newer Macintosh systems, enter the "Monitors & Sound" control panel and select "256" as your "Color Depth" in the "Monitor" dialog.
3. Go back to your desktop and start Settlers II.
