• New

Documented External Editors

The use of external editors like Script Debugger® and Scriptor® has been added to chapter 6 of the the FaceSpan 3.0 PDF manual

• Fixes

Compiler

“Enter Key” now works to compile a script.

Frontier/UserTalk

If the project script is set to UserTalk, AppleScripts can now be used in other objects.

Project Script Editor

"Checked" is corrected to "Checked" in the "Menu Item" sub menu of the "Properties" popup.

Pict Box

The hilite rule no longer defaults to "By Exchange" from the properties dialog box.

The selection rule no longer defaults to "none"

Window's minimum and maximum width

The window's width no longer wants to change to 479 if the minimum and maximum width was set to 480.

Storage items

you no longer need a window open to access storage items. You can now set/get storage items.
