

Welcome to Logical Journey of The Zoombinis™ Mudball Wall!

Mudball Wall is a small-scale adaption of one of twelve intriguing puzzles from Brøderbund's Logical Journey of The Zoombinis™ program.

Note: You must have 32 bit addressing turned on in the memory Control Panel in order for this application to work properly.

Build Advanced Math Skills

Kids help lead the Zoombinis on their escape to a new homeland using twelve sets of skills vital for understanding advanced math concepts such as algebra, set theory, graphing, data analysis and more.

As each band of Zoombinis is lead through the puzzles, randomly generated solutions automatically adjust to a player's skill level.

Logical Journey is designed to support math standards set by the National Council of Teachers of Mathematics.
