A.M.E.TM **Access Managed Environment**TM

Access Managed EnvironmentTM (A.M.E.) is an integrated security program for the Macintosh. Whether your concerns are managing a confidential government project, maintaining order on a Mac used by many people, or just preventing your child from destroying financial records, A.M.E. has a solution for you. It runs quietly in the background and is always there to protect you. The carefully designed user interface makes it easy to set up a Macintosh with just the kind of security you require.

A.M.E. gives Macintosh managers the ultimate in security with many levels of access control, activity tracking, file protection, and user privilege settings. A.M.E. can also protect software with continuous virus protection and prevent illegal copying with the run-but-not-copy setting.

The activities log can be set to monitor selected operations. Powerful filtering capabilities let you analyze the log by user, activity, and time. The results can then be exported to spreadsheet or text file. This feature can be very valuable for billing of specific jobs, or managing computer use.

When it comes to security, nothing beats A.M.E.

QuickDEX™

Picture a giant Rolodex™ the size of a small ferris wheel on top of your desk, filled with thousands of cards. Imagine all that information integrated into one smooth little DA named QuickDEX. Type in a name, zip, or any bit of text and out of that mass of information QuickDEX can find the card that you need, instantly. It's on the screen before you can exhale! It's so fast, it's almost as if QuickDEX knew what you needed before you asked for it.

Now imagine having access to eight ferris wheels on the screen at once—one each for personal friends, business contacts, product information, potential customers, membership lists, worst dressed office personnel, or whatever you need. Liberate your desk from stacks of business cards, multitudes of Post-Its, and To-do

lists that you can never find. You're getting the idea of QuickDEX's expansive capabilities—add to this that QuickDEX uses surprisingly little memory.

“....Once you install it, you can't live without it.” Steve Levy, *Macworld*.

QuickDEX won the personal productivity award at the 1988 Summer Consumer Electronics Show's Innovations '88 Software Showcase.

MacGuide Magazine gave QuickDEX one of ten 1988/Winter Golden Gavel awards recognizing the top programs of 1988.

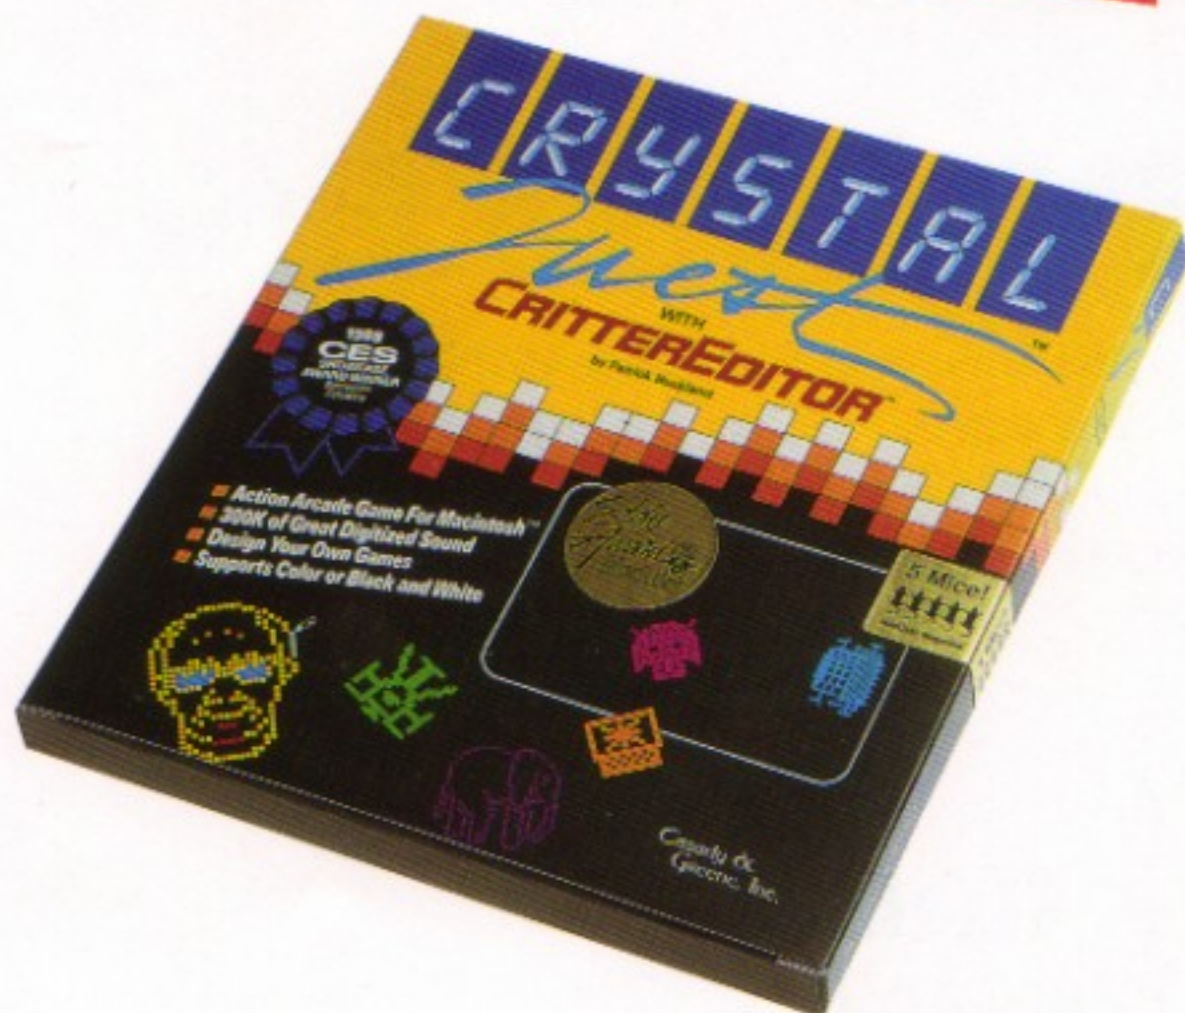

“QuickDEX is the speed champ. It found the key word in a fraction of a second, faster than my stopwatch reaction time.” Steven Anzovin, *Compute Magazine*, Dec. 1990. Article *Getting Organized*.

CRYSTAL QUEST™

Best Action Game 1988 - Macworld

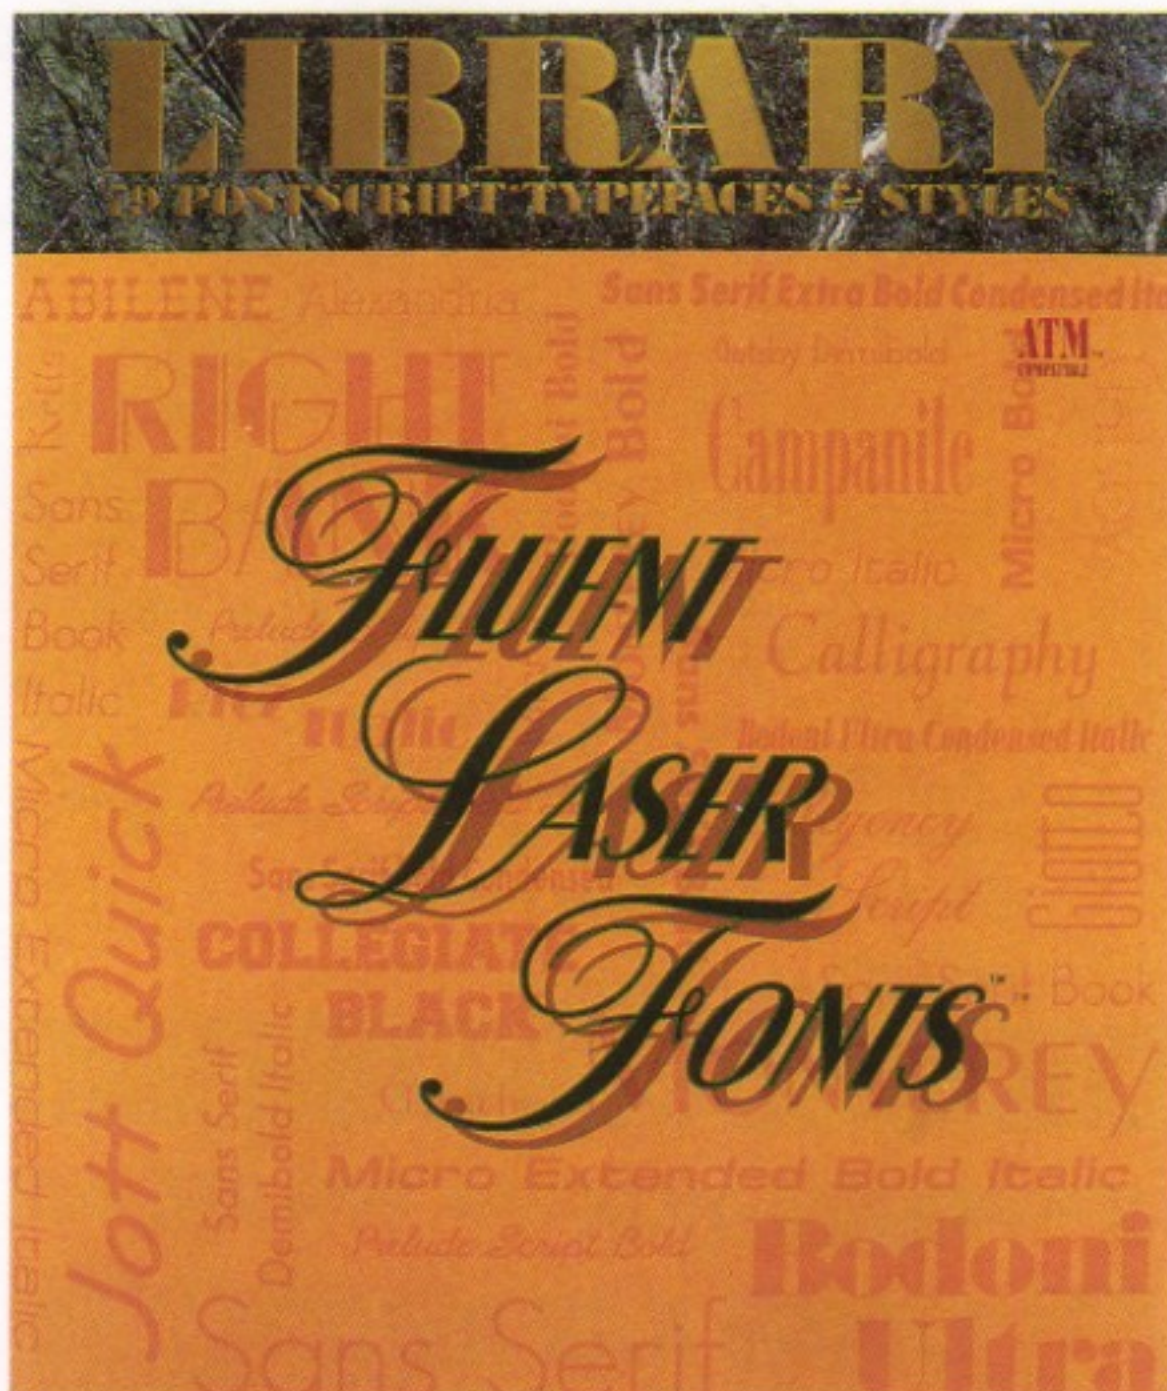

Crystal Quest Version 2.2 is a fast moving, adrenaline-boiling smash hit game. Crystal Quest has 300K of incredible digitized sound. Your job is to collect all the crystals and avoid all the mines, bullets and 12 varieties of super-nasties who are out to get you in 40 different waves! Some nasties hide in corners and gush hailstorms of bullets. Others are quite harmless unless you stand still; then they seek you out like cruise missiles. Other nasties don't die when shot — they just hibernate and awaken meaner than ever! Chosen Best Action Game 1988 by Macworld (12/88).

CRITTEREDITOR™

1989 MacUser Eddy Award: Best New Recreation Program

Crystal Quest with CritterEditor gives you the power to create your own style arcade game in color or black and white. Master the CritterEditor and you have in your hands a graphics editor, sound editor (with 300K of great digitized sound), and the import and export capabilities to transform the treacherous world of Crystal Quest. You can change over 1,000 parts of Crystal Quest. Want to put your favorite friends, enemies, political figures, film stars, etc. into your game? Draw them, record their most memorable blunders or expressions, program their homing or avoidance instincts, colorize them, and store these characteristics. Then create your own personal arcade games — funny, serious, intense, silly, or easy — and trade them with other CritterEditor owners. Chosen as 1988 CES Showcase Award Winner; 1988 Best Mac II Game by Macworld (12/88); 1988 Best Construction Kit- Home Office Computing (1/89).

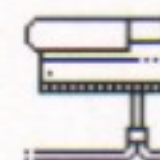

Requirements: MacPlus™ or greater and a hard disk.

ATM™
COMPATIBLE

FLUENT LASER FONTS

LIBRARY

LaserWriter™ DeskWriter™ ImageWriter™

*ATM (Adobe Type Manager™) is required for use with the DeskWriter and ImageWriter.

A NEW PACKAGE OF 79 POSTSCRIPT® TYPESTYLES

A remarkable font package at a remarkably low price. This Library contains 79 different Type 1 fonts that work on PostScript® printers and are compatible with ATM (Adobe Type Manager). When used with ATM, these fonts can also be printed on many non-PostScript printers. This beautifully designed font collection is easy to install and easy to use. Fluent Laser Fonts can be printed at any size your software allows and will print at the maximum resolution of your PostScript compatible printer, no matter what point size you select. PostScript hinting technology and extensive kerning pair information are included in most styles, adding professional quality to your printouts. A variety of clean screen fonts are also included for optimum screen representation. The standard Latin character set includes characters for most Western European and Scandinavian languages.

MISSION STARLIGHT™

Starlight rebel pilot, go forth! Your starfighter awaits to take you into pure hyperactive arcade madness! The deadly, evil leader of the empire of Aalgezy, Adolf Blitter, has enslaved the people of your own Procyon solar system and is stealing all your resources! What are you going to do? For Procyon's sake knock out Blitter's power plants which generate his protective force field, attack the evil base station that lurks in the middle of the five Procyon planets, seek out Mr. Blitter and destroy the bum! Even the most jaded video game enthusiasts will be out-and-out ecstatic at the explosive, realistic flight action of this game! Just remember, under no circumstances

should you plan on quitting this game. Starting right now just give up the spare time you had set aside for other minor undertakings—that certain best-seller, college graduation, raising your children to adulthood! Quitting Mission Starlight is MISSION IMPOSSIBLE!

Requirements: MacPlus™ or greater. For color, 2Mb RAM or more recommended.

SKY SHADOW™

It's another mind-blowing, fast action (and we mean fast) arcade game with great sounds from Patrick Buckland, the writer of Eddy-award-winning Crystal Quest™.

Sky Shadow: Refuse your mission and stay home with your blanket, chicken soup and little liver pills...or NOT! Your people need you! The dreaded, bloodthirsty Razoropers have all but destroyed your home city. Only your audacious, white-knuckled bombing raids over enemy territory can save them. Rack up points by destroying ghastly enemy beasts while avoiding damage to your own ship. At the score of 100,000 points, watch your heart rate! You will be entering Mega-Mode with double game

speed, double game action, and Mega-scoring power! It's like swatting your way out of a swarm of bees! Warning: Side effects are unavoidable. Be prepared for late, sleepless nights and uncontrollable cravings for more and more Sky Shadow!

Requirements: MacPlus™ or greater
