

SYSTEM INFORMATION
AND
MANUAL ADDENDUM

MACINTOSH AND AMIGA
VERSIONS

MACINTOSH VERSION

HARDWARE REQUIRED

Macintosh Plus, Portable, PowerBook Family, SE, SE/30, Classic Family, LC Family, II Family, Centris Family, Performa Family, Quadra Family. Black and white version requires 1 MB of RAM, 1.5 MB under System 7; color version requires 2 MB of RAM, 2.5 MB under System 7. Hard drive required.

SOFTWARE REQUIRED

System 6.0.5 or later. System 7 compatible.

AMIGA VERSION

HARDWARE REQUIRED

Amiga A500, A600, A1000, A1200, A2000, A2500, A3000, A4000 in NTSC, PAL or VGA. Requires 1 MB RAM for low-resolution; 1.5 MB RAM (1 MB of that Graphics RAM) for high-resolution. Two floppy drives; hard drive recommended. Printer option.

SOFTWARE REQUIRED

Requires Workbench 1.3 or later. Release 2.0/3.0 compatible.

INSTALLING MACINTOSH CONSTRUCTION SET

The Construction Set must be installed to the same folder as the A-Train program. To install, drag the Construction Set icon from the disk to the folder. Double-clicking on the Construction Set program icon will load the application.

INSTALLING AMIGA CONSTRUCTION SET

Double-click on the "Install Construction Set" icon on Disk 1. The installation program gives you three choices—Novice, Intermediate, and Expert. Novice provides a fully automated default installation on your hard drive, Intermediate allows you to direct the application's storage, and Expert gives you full control over every step of file creation and storage. See the Installer Help screens for more details. To install a printer driver on a floppy, double-click on "Install Printer" in the Utilities drawer on Disk 1. The Construction Set must be installed into the A-Train drawer.

If you intend to print the Construction Set map landscapes, be sure to correctly set up your machine's Preferences for printing. Under KickStart 1.3 or earlier, you must use the Preferences program for setup. Under Release 2.0 or later, you must use both the Printer and PrinterGfx Preferences programs found in the Prefs drawer. You can get clarification of these procedures by reading "Using the System Software" in your Amiga manual.

To run the Construction Set from a floppy, insert Disk 1 into your machine and boot your computer. The example games must be installed onto a formatted blank floppy. To install, double-click on the "Install Example Games" icon. The installation utility will ask you where to install the examples. Insert the formatted floppy, select it, and then select Proceed.

MANUAL GRAPHICS

The graphics shown in the manual are gray-scaled renderings, mostly from the color Macintosh version of the program. Users with monochrome systems won't be able to see the color-coding of trains and train numbers on the "calendar chart" in the Train Registry, as well as some other color-issue incidentals, but gameplay won't be affected.

ABOUT THE INCLUDED DISKS

If there is a problem with your Construction Set disks, please call Maxis Customer Service at (800) 33MAXIS to replace the disks free of charge. If you are having installation problems, see the Technical Support info. Please have your complete Construction Set package with you when you call.

TECHNICAL SUPPORT

If you have any problems getting the Construction Set to run on your computer, and they are not addressed in the manual or this addendum, call or write:

MAXIS
2 Theatre Square
Suite 230
Orinda, CA 94563-3346
