

CD ROM

DEMON *Gate*

OVER 600 NEW LEVELS FOR DOOM & DOOM II

**REQUIRES DOOM II
or REGISTERED
VERSION OF DOOM**

The Hottest • Direct From The Internet

Thanks for purchasing Demon Gate! On this CD-ROM are over 600 new ways to play the best action game yet, DOOM II. This huge collection of DOOM files may include new sounds, graphics or even completely new worlds that expand

the ways you can play. To make it easy to start DOOM II with the level you want we've included the EASYWAD utility. Laser Magic Demon Gate requires DOOM II be installed before using any of the levels. on the Demon Gate CD-ROM.

MACINTOSH USER INSTRUCTIONS

1 TO USE A DEMON GATE LEVEL.

Put the Demon Gate CD-ROM into the CD-ROM drive.

2 Double-click the folder containing the desired level.

 Double-click the desired level.

3 Or refer to your DOOM II manual instructions for alternate level loading methods.

PC INSTALLATION INSTRUCTIONS

1 Exit Windows if it is running on your computer.

2 Type D:\DMGATE and press ENTER at the DOS prompt. If your CD-ROM drive is not letter D, change to the appropriate letter.

C:\>CD D:\DMGATE

3 To quickly install the EASYWAD utility on most machines, use your mouse to click on the button labeled "Auto Install" or just press the ENTER key.

4 In a few seconds a message will appear with instructions on how to start the EASYWAD interface. Press ENTER again to return to the DOS prompt and type EW2, or EW for DOOM 2 or DOOM respectively. At the DOOM Directory prompt (C:\DOOM2>)

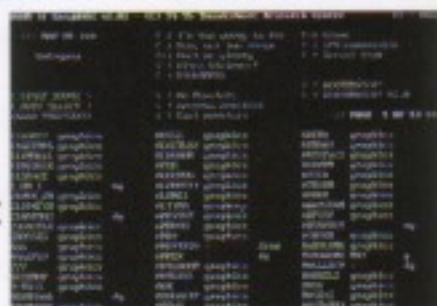

You are now ready to choose a level and start playing DOOM with the options you want. Do not use the DMGATE command to install EASYWAD again. Just type "EW" or "EW2" instead of when you have typed DOOM or DOOM2 before. You may still start DOOM without typing "EW" but you will not have these same options.

EASYWAD INSTRUCTIONS

**DO NOT START WITH "EASYWAD2",
AS THIS WILL DROP YOU BACK TO
DOS AFTER YOU HAVE SELECTED
EVERYTHING!**

You will see a screen with the following items:

- The skills;
- The playtypes;
- The starting map;
- 2 map pagers ("<<<" and ">>>");
- A DEATHMATCH item;
- A DEATHMATCH v2.0 item;
- A No monsters item;
- A Respawn monsters item;
- A Fast monsters item;
- Loads a WAD files with an info field;
- 2 WAD pagers ("<<<" and ">>>");
- A (START DOOM2) item;
- A (AUTO SELECT) item;
- A (READ PREVIOUS) item;
- A mouse pointer if a mouse was found :)

When you move the mouse, each line can be highlighted. Use the left mouse button to select each field. You can select as many WAD files as you like. Just click again on a WAD file to de-select it. If you have more than 54 WAD files, then use the pagers to see the next/previous page.

You can quit directly by pressing the right mouse button or the [ESC] key.

(START DOOM2) When you're done clicking, punch the left mouse button on this field and play the selected DOOM part. What happened is that the program made a batch file "START.BAT", which is automatically started. This is useful (Yep, really!). If you finished playing, but want to play the same thing again, just type "START" at the command line instead of "EW".

(READ PREVIOUS)
does the opposite. It reads the file "START.BAT" back and sets all values accordingly. All files are automatically selected.

ORDER FORM/REGISTRATION

EASY WAD INTERFACE KEYBOARD COMMANDS

[.] Select next map
(This is the key with '>' on it)

[.] Select previous map
(This is the key with '<' on it)

[S] Change (S)kill;

[T] Change play(T)ype;

[D] Toggle (D)eathmatch;

[V] Toggle deathmatch (V)2.0
Notice that you cannot select both
the deathmatch items;

[M] Toggle No (M)onsters item;

[P] Toggle Res(P)awn monsters item;

[F] Toggle (F)ast monsters item
Notice that 'No monsters' cannot be used in
conjunction with respawn or fast monsters;

[A] Activate (A)UTO item;

[R] Activate (R)EAD PREVIOUS item;

[ENTER] Start game;

[PAGE UP] Next page of WAD files;

[PAGE DOWN] Previous page of WAD files;

[ESC] Abort EasyWAD.

If no mouse was found, then select WAD
files with the keys

[CURS UP] (Wraps to bottom)

[CURS DOWN] (Wraps to top)

[CURS LEFT] (Wraps to far right)

[CURS RIGHT] (Wraps to far left)

[SPACE] (Un)select pointed WAD file

THE INFOFIELD:

After a WAD file name comes the infofield.

The first part shows the maps that are
patched by this file;

Mx-y means: Maps x through y;

Mx,y means: Maps x and y;

After this come the other patched parts:

"c" = new (C)olors (palette change);

"d" = new (D)emos;

"s" = new (S)ound effects;

"m" = new (M)usic;

"p" = new s(P)rites;

"g" = new (G)raphics.

If a WAD file patches only one part, then
the complete name is printed.

For example, a file that only contains new
music will have a field "music", etc.

TO INSTALL: From the PROGRAM MANAGER choose FILE, then RUN. Type D: Setup and click OK. Change drive letter if your CD-ROM drive is different.
