

FOR MACINTOSH

A Hot New Game From ISM

SURGEON 3 THE BRAIN

A SIMULATED SURGICAL OPERATION GAME.
IT'S ANIMATED, EXCITING AND FILLED WITH
CHALLENGES.

Are you ready to examine the patient?

Do you know how to interpret the x-rays, CAT scans, and MRI's?

Do you have the skills, the steady hands and nerve to perform a successful operation on your patient's brain.

Every action that you take will determine the outcome. You could graduate or be sued for malpractice. Your patient could survive or die. The responsibility is yours.

Accept the challenge and test your surgical skills with SURGEON 3, THE BRAIN.

Black and white version - \$49.95

Color version - \$59.95

StoRY-MaTion

A NEW PROGRAM FROM ISM Inc.

***STORY-MATION allows you to create your own animated stories!
Be creative and have fun, while learning english
at the same time!***

Paint tools Palette has all the tools you need to let your creativity run wild. Paint the background with the tools or add images created in other paint programs.

Objects! From trees to chairs, you can choose from a collection of objects and place them in the background. Objects can be resized and moved further away or closer in.

Characters! Next, place a Character. Select from a boy, a girl, a dog, a cat and a bird. Write the story and watch them do the rest.

Sound! Sound! Sound! Add a voice and narrate the story. Add any sound to almost any part of the program.

Prices: Black and White - \$49.95 Color - \$59.95

Play the animations! Use the buttons! Let your imagination loose!

Try this fun and exciting new program!

PRESENTING *Now* 3.0 THE REAL-TIME PRESENTATION-ENHANCEMENT UTILITY

Sometimes, even the best persuasion isn't enough.

Sometimes, even the best-laid presentations aren't enough. No matter how much planning and preparation went into its making, a presentation can fail to do its job.

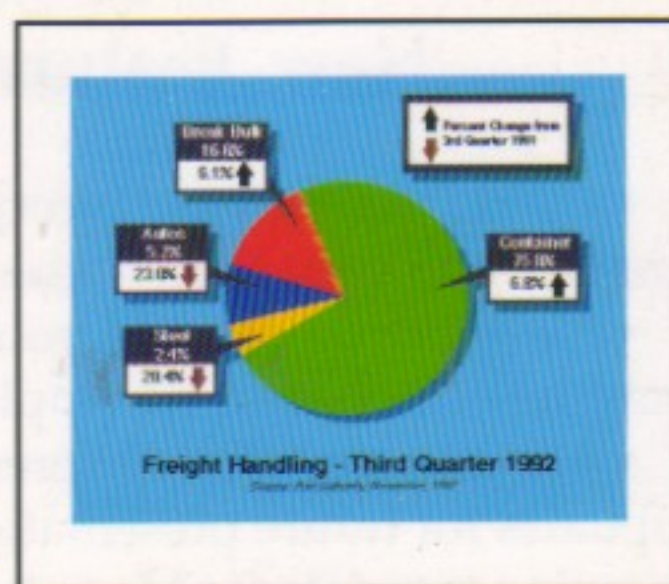

Sometimes, it's something as simple as a question from your audience - a question that makes you realize that they're just not getting the point you wanted to make.

Sometimes, it's a matter of having to tailor it to an audience your boss decided should see the presentation - at the last possible minute (of course).

And sometimes, you have to teach others how to use Macintosh™ applications - even if you can't be around to teach them yourself.

PRESENTING NOW 3.0 can help with those "sometimes".

PRESENTING NOW 3.0 lets you customize your presentation - *on the fly* - to make sure you get your message across the way you want it to be seen. Whether it's an oversized pointer, highlighted, flashing text in multiple fonts, or a simple arrow drawn from Point "A" to Point "B", PRESENTING NOW 3.0 will help you get your message through - *right now, your way!*

Sometimes, something that's already pretty persuasive.....

...can be made even more persuasive - in real time!

PRESENTING NOW 3.0 can help you in the heat of the moment- without getting you hot under the collar.

PRESENTING NOW 3.0 is designed to work in the with your presentation hardware (LCD display, projector, or large-screen monitor), and runs in the background with your presentation software - available at a single keystroke to help you command your audiences' attention - simply and effectively. If you can run presentation software on your Macintosh™, you can run PRESENTING NOW 3.0.

And with PRESENTING NOW 3.0's Journal feature, you can set up self-running tutorials for Macintosh applications - enabling you to show new staff members how to use those programs to your company's best advantage.

When used with the new PowerBook™ line of personal computers, Presenting Now 3.0 gives you a powerful, portable presentation system that's compatible with the Apple System 7 operating environment.

Check out PRESENTING NOW 3.0 today - and find out how easy it is to make your point - *your way.*

Presentations Come Alive with PRESENTING NOW 3.0

ISM, Inc. • P.O. Box 247 • Phoenix, MD 21131 • (410) 560-0973

Find out for yourself how much power a toolbox this simple can have.

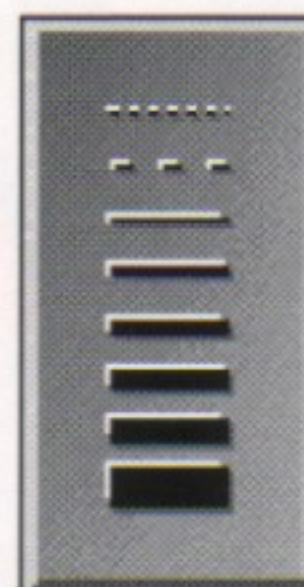

You're probably already familiar with most of Presenting Now 3.0's tools.... even if you've never used it before.

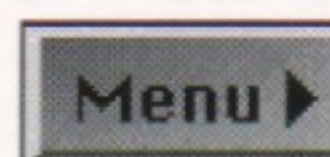

The Text Control panels of Presenting Now 3.0's Toolbox lets you place text in multiple fonts, in brackets, or in balloons... anywhere on the page, in any color.

The Server/Client and Journal Record/Play controls let you decide (via LocalTalk™) which computer is the master and which is the slave, let you record or play back everything you do as part of your presentation, or play QuickTime™ movies right in the middle of a presentation!

Presenting Now 3.0 gives you your choice of line widths and styles.

An extensive pop-up menu gives you instant access to even more presentation power!

The Windowshades give you a fast way to divide the screen... and draw attention to what you really want your audience to see.

Presenting Now 3.0 Offers...

- Oversized Pointers to indicate objects and text. Pointers may be customized with any paint program....or used the pointers supplied with the program.
- Lines to underline text or objects.
- Arrows to point from one object to another.
- Rectangles, circles and rounded rectangles, using colors or black and white patterns.
- Text generation with multiple fonts, styles, sizes and colors.
- Highlight text or objects.
- Ability to select objects and move them around.
- Paintbrushes to draw and mark objects.
- Scratch Pad for the user to scribble and draw rough sketches.
- Use Presenting Now 3.0 with the new Apple PowerBooks™ to give yourself a powerful, easy-to-carry, on-the-fly presentation system. You can even update your presentations wherever you can use your computer!

New Features For 3.0

- **QuickTime™-ready** - incorporate QuickTime movies into your presentations.
- **Networkable** - conduct your presentation on multiple computers via AppleTalk.
- **Journal** - records your presentations' interactive updates for future presentations - or to build self-running tutorials for Macintosh™ applications.
- **Publish** - automatically updates graphics produced in other programs.
- **System 7 Savvy** - takes full advantage of Apple's System 7 operating environment.
