

MUTANT BEACH

Stunning 256 color animation and 4 channel digital sound await you in the story of Native Nick, a totally laid back tropical islander. Nick, while on a fishing trip, finds a note in a bottle telling him that the nose of the Stone Idol, guardian of the volcano, has been stolen.

Angered at the loss of his nose, the Stone Idol releases a cursed cloud from the volcano which, unless Native Nick can replace the nose, will mutate the island and all its inhabitants.

Along the way Nick must overcome the dangerous, and not so dangerous mutant creatures that inhabit the island. Struggling to overcome creatures, traps, false paths and locked gates Nick must work his way from the beach, through the jungle, searching the village and then to the temple of the Stone Idols, deep in the heart of the island, where he must return the stolen nose to the Idol.

If adventure, intrigue, comedy and a cast of characters beyond belief are for you, then sign on for a trip with Nick to Mutant Beach. Where fun is the name of the game and no one dies.

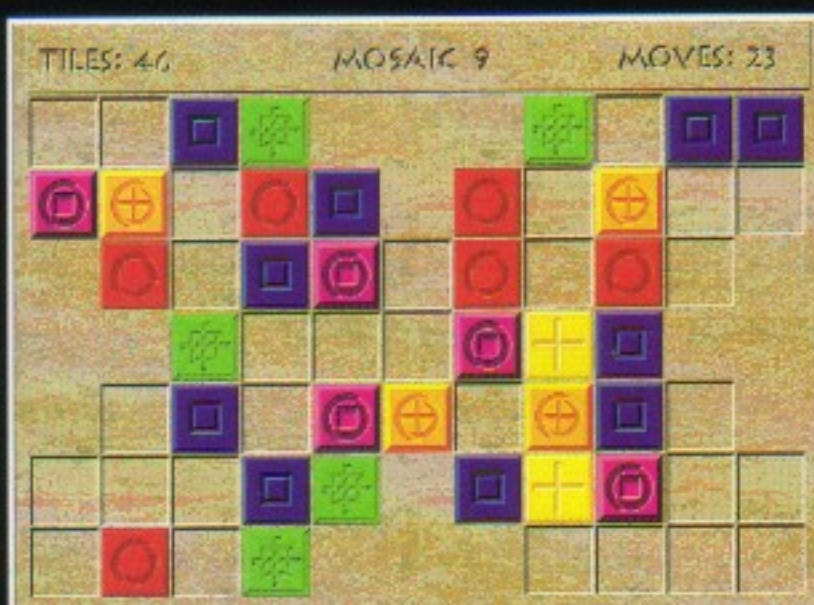

swamp

Explore the geography of the United States flying saucer in Swamp Gas. Visit all the landmarks on your itinerary, and discover during "close encounters." When you relax in the Alien Arcade, where you can play arcade-style games. With three levels of difficulty and a choice of four levels of difficulty designed to appeal to adults and children love its digitized sound and wacky color.

TESSERAEE

Tesserae is a color puzzle game in which the player eliminates tiles from a "board" according to color and texture. When only one tile remains on the board, a different, more difficult arrangement appears. For the beginner, the object of the game is to remove as many tiles as possible. The more advanced player tries to improve his high score by using the fewest possible moves. A series of nine boards makes a game. Includes extensive, animated on-line help illustrating possible moves.

"Tesserae is so appealing that you'll play for hours without becoming bored...may be the perfect escape."
inCider/A+ Magazine August 1991

"Tesserae is the first 'really different' game I've seen in a long time...just the right frustration level."
Diskette Gazette April 1991

INLINE

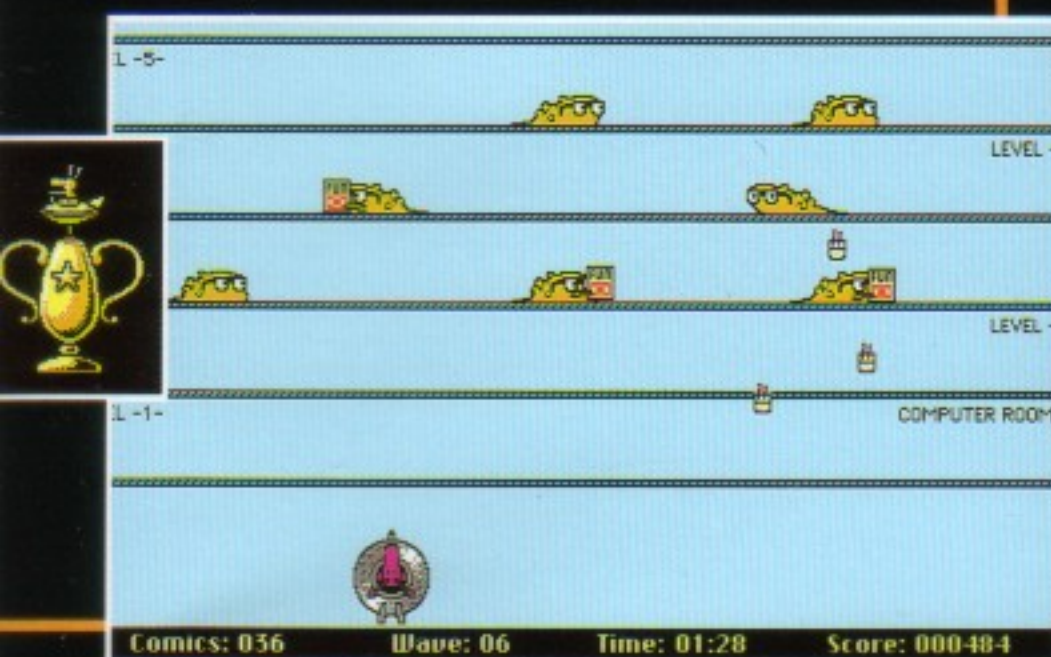

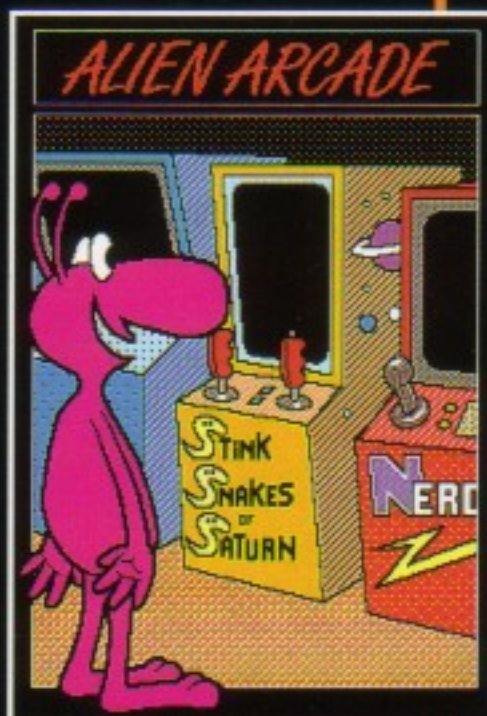

Inline Design is one of the rare boutique publishers. We owned (and loved) our publishing company, so we think Macintosh game-player. We take our time and we love to talk about our game.

GO MACCVEN

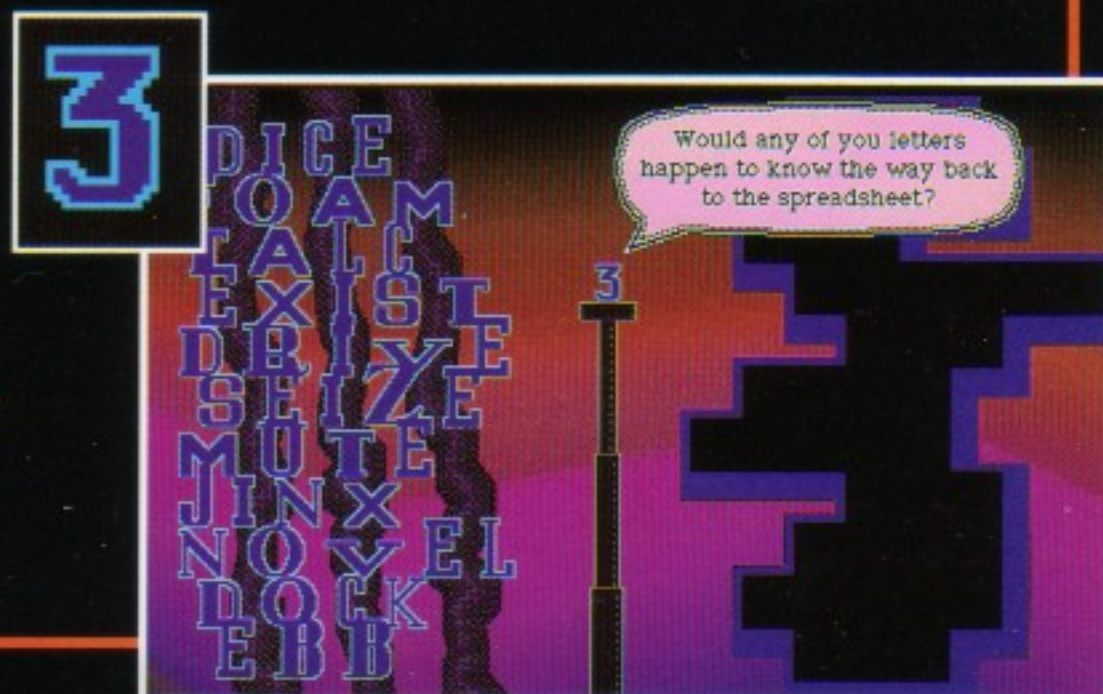

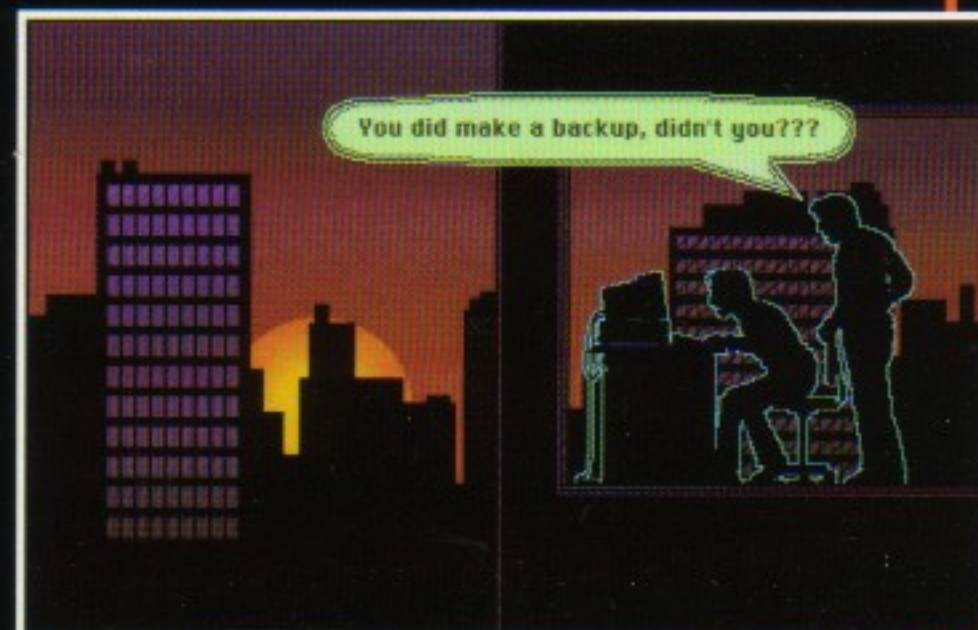

in Three™

Ever wonder what really goes on inside
that computer of yours?

3 in Three takes you on a madcap
journey inside your Macintosh when a
freak power surge zaps the number 3 off
a petty cash report and abandons her in
a land where numbers don't count and
the letters spell disaster! A tour de force
of animation and sound, 3 in Three is
an interactive treasure hunt, an
unfolding trail of word puzzles, logic
dilemmas, and sinister brain twisters,
over eighty in all.

When all the pieces fall into place, an
animated grand finale await those who
help the 3 find true happiness!.

DARWIN'S DILEMMA

THE SOLUTION IS EVOLUTION

Darwin's Dilemma is a color strategy game loosely based on the ideas of evolution. The player must move through the 24 levels of the game by positioning, colliding, and merging icons that represent increasingly complex life forms. Each level presents new creatures and an intriguing puzzle to solve. Like a classic board game, Darwin's Dilemma is easy to learn but difficult to master.

"A fun, highly addictive game"

MacWorld January 1991

4 1/2 Mice
