# NEAR MISS

## THE AIR TRAFFIC CONTROL SIMULATOR

YOU are the Air Traffic Controller in charge of a busy air sector. Suddenly, the sky is filled with aircraft. If you don't react with lightning speed, a Near Miss could turn into a disaster. The lives of thousands are in your hands . . .

NEAR MISS lets you control the airways . . . can you take the pressure? A jet is flying toward a mountain . . . turn it away. Another jet is entering your sector . . . put it on course. That propeller plane is almost out of fuel . . . land it fast. A helicopter is flying into a deadly storm . . . what will you do?

### As the Air Traffic Controller you select:

- From a fleet of 60 aircraft including jets, propeller planes, and helicopters
- Up to 5 airports
- Hills, towers, and restricted zones
- Modifiable weather conditions
- Flight paths, arrivals, and departures.

### The control center includes:

- Command Center and Radar Screen
- Conflict Alerts
- Realistic aircraft sound and voice radio commands

### SYSTEM requirements:

Macintosh 512, Plus, SE and II  
One 400K disk drive  
Sound and Voice on  
Macintosh 512, Plus, SE.  
Color and Sound on Macintosh II.
