

For bugs and other, mail to:

tina@alessia.dei.unipd.it

Enjoy yourself!

Pellizzon Andrea

P.S. I hope English syntax errors are accepted,
because I'm only a poor mathematic student!

New Game,Open,Save as...,Quit
(don't need explanations !!!)

Edit:

This Menu is disabled and
automatically enabled when
using a Desk Accessory

Moves:

Back:

returns back one move;

Forward:

go forward one move;

Panic:

useful option against
coach , mother and father!!!

Help:

Do you think explanations about
Help menu are necessary?

Volume:

Level 0:

.....

Level 7:

Set volume level.

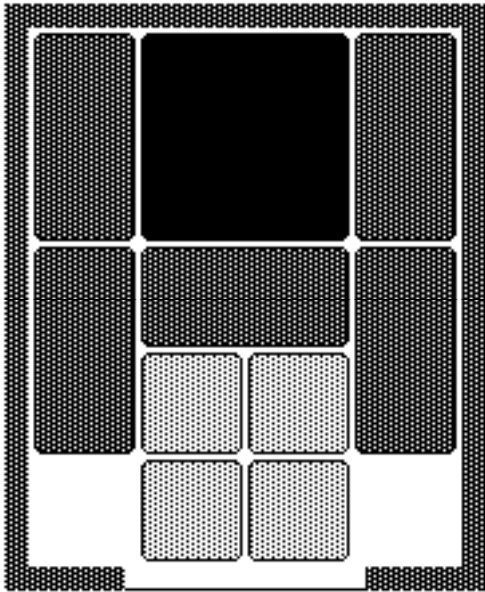

W A R N I N G:

I checked this game only with System-Finder version T6.02
May be older versions are no good to run "Quo Vadis ?"

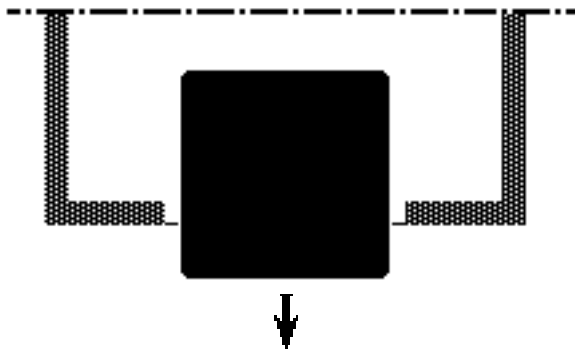

QUO VADIS?

“Quo Vadis ?” is a nice wooden game that I implemented on Mac for fun. Rules are very simply, but if you don’t know them, I’ll teach you step by step.

When you start “Quo Vadis ?”, the initial position is:

and the end position must be:

Menu Options:
