the past

In the earliest centuries of mankind, our ancestors entertained themselves by throwing small marked pieces of bone and wagering on their fall. These implements eventually became what we call dice.

Sometime later, the Chinese changed the dice into tiles, and created a game we call dominos. In 1120 ad, during the reign of Siuen-ho, dominos became standardized in the form we still know today. But over time, new and different versions of dominos came to be played in the provinces.

In the early part of this century, Joseph P. Babcock, an American businessman living in Shanghai, made a study of one of those games. It was called ma chiang, ma cheuk, or ma ch'iau, all of which are dialect names for "sparrow," the "bird of 100 intelligences." In 1920, he brought the game and its colorful tiles to the West under the name Mah-Jongg. Mah-Jongg became a huge fad in the English-speaking world and has retained its attraction ever since.

But Mah-Jongg is not the only variation of this ancient and intriguing obsession. Now from the Orient come Shanghai and Dragon's Eye...

shanghai

OBJECTIVE

The object of Shanghai is to remove all the tiles from the layout, one pair at a time. To be removed, both tiles in a pair must be free at the same time and must match. A tile is considered free if there's nothing on top of it, and if it can slide out to the left, to the right, or both. A tile which can only slide toward the top or the bottom of the screen is not free.

There are usually four of each tile, which can be removed as two matching pairs. In some tile sets, there are four unique tiles. Each of these tiles matches any other tile in its set. For example, in the Fantasy tile set, the Court tiles consist of the King, Queen, Princess, and Jester; any Court tile matches any other Court tile.

GETTING STARTED

If you do not select a layout, you default to the Shanghai layout, using the Mah-Jongg tiles. To remove a pair of tiles during the game, simply select the two tiles you want. To select a tile, click on it with the mouse. (With the DOS version you can also click on the tile with the joystick button, or move the cursor onto it with the arrow keys and hit **Enter**.) If a tile is eligible to be removed, it will become highlighted. Selecting a matching tile removes the pair. (With the Mac version you need to double-click the matching tile to remove the pair.) Continue to remove matching pairs until the layout is gone.

As you remove tile pairs, the game tells you how many tiles still remain in the layout. Thus, if you see "32" at the right corner of the menu bar, you know that there are still 32 tiles (16 pairs) to be removed.

If you change your mind about selecting a tile, just click on it again, and it will become unhighlighted — or simply select another eligible tile. If you choose an inappropriate tile, it will automatically become unhighlighted.

changing layouts and tile sets

You can play Shanghai with any of thirteen layouts using any of eight tile sets. To change layouts or tile sets, select the **Options** menu and then select **Load Layout** or **Load Tile Set**. You can then select the new layout or tile set by selecting the appropriate name and then the **OK** button. Note that if you select a new tile set in the middle of a game, you will automatically start a new game.

strategy hints for shanghai

There are three levels of difficulty in the layouts. (Each group below is listed alphabetically.)

EASY

- Boar
- Dragon
- Rat
- Snake

ADVANCED

- Dog
- Monkey
- Ram
- Rooster
- Shanghai

MASTER

- Horse
- Ox
- Rabbit
- Tiger

- 1) Concentrate on removing tiles that are blocking the most moves. There are few such tiles in the Easy layouts, several key blocking tiles in the Advanced layouts and multiple blocking tiles in the Master layouts.
- 2) Examine each layout carefully before starting play to find as many matching pairs as possible. Also, in the Advanced and Master layouts, check for tiles that you will need to unblock as soon as possible. It is often better to concentrate on long rows than on tall stacks.
- 3) Always check for triples. If you've found a pair to remove, look for a third (or fourth) free tile that also matches. If you take two out of three matching tiles, make sure the one you leave is blocking the fewest important tiles. If you're not sure what to do with a triple, leave it and make another move instead.
- 4) If you see all four tiles of one kind free at the same time, remove them so they're out of your way.
- 5) Look ahead as many moves as you can.

the dragon's eye

In a time now clouded to both East and West, the Red Empress bore her husband twin children — a boy with flashing black eyes, and a girl with eyes as pale as ivory. But in the earliest days of the children's lives, the girl-child was stolen away. Though the Emperor strongly suspected a Magician who bore him an ancient grudge, a complete search of the empire yielded no trace of the little girl.

Twenty years later, the Red Emperor died, and his son, now grown, succeeded him. But on that same night, a fearsome roar echoed from the earth, and in the following days terrified peasants reported that a dragon had appeared upon the land. The new Emperor did not fear dragons, for he had been well taught, and knew that the power of the beasts could be used for good as well as ill. And it was well with him that he thought so, for the next evening, as he strolled alone among the far reaches of his estates, he stepped out from a forest and found himself face to face with the creature.

Staring into its face he saw pale ivory eyes.

Immediately realizing that this was his sister transformed, he summoned the Magician to his court. The old man came, unrepentant. "These twenty years she has been a beast," raved the Magician, "growing in a secret cave, under my watchful eye. And now that she is fully grown, she will lay waste to your empire for me."

But the Emperor challenged the Magician to a game of skill he had devised. Whoever won should control the other. And with the encounter in the forest still foremost in his mind, the young man called his game "Dragon's Eye."

Each tile was played with infinite patience. Four days passed as the antagonists pursued their contest. But finally, as the fourth evening was falling, the Emperor won his game. Pale and exhausted, the old Magician sat back — and for the first time smiled. "You have won," he hissed through discolored teeth, "but the prize you played for is illusory. I transformed your sister into a dragon, yes, but no power on earth or in heaven can return her to her human state."

"You misunderstand my desire," replied the youth. "My sister has been a dragon all her life; she knows nothing else. She could not be happy as a human being. But neither can she know happiness as the sole representative of her new race. So this is the prize you will give me: you will transform me into a dragon as well!"

Then he willingly submitted to the Magician's power, so that soon two dragons were seen in the empire—a boy with flashing black eyes, and a girl with eyes as pale as ivory.

how to play dragon's eye

getting started

Begin Dragon's Eye by selecting **New Game** in the **File** menu, then choosing **Dragon's Eye** from the listings. (NOTE: On the Mac version you can begin Dragon's Eye by selecting **Choose Game** in the **Settings** menu, then choosing **Dragon's Eye** from the listings.) In the DOS version, you will not be able to play Dragon's Eye as a Master, nor can you play the 2 player game, until you complete all four Rounds of a Tournament. Once you complete a Tournament, Dragon's Eye is added to the **New Game** listings in all modes.

the dragon display

On the left side of the screen is the Dragon display. When you start a game, eight tiles appear on the board. The six face-up tiles are the Dragon's "limbs" and the two face-down tiles are the Dragon's "heart." Should they later become cleared, you'll see that the spaces beneath the limbs are light gray and the spaces beneath the heart are dark gray.

At the bottom right side of the screen are five tiles; these form the Dragon Slayer's hand. There are also three tiles at the top right of the screen; these form the Dragon Master's hand.

OBJECTIVE

The objective of the Dragon Master is to build the Dragon to full strength by filling all spaces on the display one level high, and all spaces on the Dragon's heart and limbs two levels high. The Dragon Slayer, on the other hand, tries to remove all tiles from the "heart" and "limb" spaces. In either case, this is an automatic victory for the player. Players gain points during a game as explained in the **Scoring** section.

how to play

The Dragon Master places tiles on the Dragon display to fill it up. The Dragon Slayer tries to remove matching tile pairs from the display to empty it, but he must place a tile on the display if he can't find a match.

A tile becomes blocked when tiles are placed adjacent to it on both sides and cannot be removed until it is unblocked. Blocked tiles are inverted. When the Dragon Slayer removes a tile that blocks others, the now-unblocked tiles turn face up and are available to be removed.

Second-level tiles are placed only on eligible face-down tiles of the heart and limbs. These eligible tiles have distinctive backs to indicate that they are eligible.

As soon as the last open space on the second level is filled, and the Dragon Slayer can't make any more moves, the game ends. If all tiles are removed from the heart and limb spaces, the game ends. If all 144 tiles have been drawn and played and the Dragon display is not completed or emptied, the game ends; in this case, the players' scores are compared to determine the winner.

VARIATIONS

In the default settings, you play Dragon's Eye as the Dragon Slayer, with the computer playing the Dragon Master. At the beginning of each round in a Tournament game, you play Dragon's Eye in the mode you chose for the Tournament, alternating, round by round, between Dragon Slayer and Dragon Master.

The Master and Slayer options are solitaire games. When you play solitaire against the computer, you see the tile played by the computer if it's placed face up on the display, but not if it's placed face down. The tiles in your hand are always face up.

In **Challenge** mode (two-player), players alternate turns as usual. Both hands are face down. When your turn comes, have the other player look away and select **Flip** to turn your hand face up. When you finish your turn by selecting **Done**, your hand automatically flips face down.

the dragon slayer's turn

The Dragon Slayer always goes first. If you are playing **Challenge** against another player, select **Flip** to turn the tiles in your hand face up. Note that there is a finger pointing to your hand when it is your turn. The pointing finger is white when you can draw a tile or make a match. The finger turns gray after you've been forced to discard a tile onto the display and can do nothing more except end your turn.

You have five tiles in your hand to begin with. As your turn begins, a sixth tile is automatically drawn for you.

You now try to remove matching tile pairs from the Dragon display. Removing tiles is the same as in Shanghai. You select a tile in your hand or on the board and then select a matching tile. The tiles are removed. You may remove as many tiles as you can or wish to.

If you ever have less than five tiles in your hand, you can immediately draw new tiles using the **Draw** button on the display. You continue to match tiles until you no longer can or wish to.

If you have six tiles and can make no matches, you must discard one of the tiles in your hand onto the Dragon display. Select the tile you wish to discard and then the space on the board where the tile is to go; the pointing finger will turn gray. At the end of your turn, you can have a maximum of five tiles in your hand.

Once you've completed all available actions for a turn, select **Done** to end your turn; in the **Challenge** mode, your tiles will also flip over. The finger now points at the Dragon Master's hand.

the dragon master's turn

The Dragon Master always goes second. When the finger points at your hand, it's your turn. You start the game with three tiles. In a two-player game, select **Flip** to turn your tiles face up.

In your turn, you place one of these tiles on the board.

You face only one restriction when placing tiles. If any Dragon "heart" or "limb" space is open (they are the light and dark gray spaces in the center of the display), you must fill this space, with a "heart" space having precedence over a "limb." If the "heart" and "limb" spaces are all filled, you can place the tile anywhere.

You will want to place tiles to block as many spaces as possible.

After you place a tile, the pointing finger turns gray. You must now draw another tile and end your turn. Select **Draw**; if you forget to draw a tile at the end of your turn, the computer will automatically draw one for you. You can never have more than three tiles in your hand.

Select **Done** to end your turn. In two-player mode, your hand will be flipped when you select **Done**.

strategy hints for dragon's eye

dragon slayer hints

- 1) Keep drawing as many tiles as possible to continue making matches. Remove all matching tiles from the board as soon as possible.
- 2) If you have a matching pair in your hand, place one of the pair on one of the six spaces at the edges of the Dragon that block two tiles each. You'll be able to unblock those spaces later at your convenience.
- 3) Don't worry too much about having to put tiles on the Dragon display. You will usually find "cascades" happening, where matching pairs of tiles suddenly appear all around the display.
- 4) If you must put a tile on the display, try to place it in a space where it does not block others.

dragon master hints

- 1) Although you have only three tiles in your hand, you control the pace of the game. Your objective is to bury matching pairs so your opponent cannot remove them. Try to capture the six outer spaces on the display that block two spaces each.
- 2) Try to remember which tiles have been removed. If a pair has already been removed and you place a third similar tile on one of the outer spaces, there is only one tile remaining that can be matched and unblock the two tiles.
- 3) You will often have three tiles in your hand that match others on the display. Place the tile that will do the least damage by unblocking the minimal number of other spaces. You may be able to bury the more damaging tiles in future moves.

the tournament game

A Tournament game consists of four rounds. In each round you play four layouts: Dragon's Eye, then three levels of Shanghai (Easy, Advanced, and Master). You can play a Tournament in **Solitaire** or **Challenge** (two-player) mode. Before the Tournament begins, you can enter player names using the **New Game** option in the **File** menu. (NOTE: In the Mac version, use the **Choose Game** option in the **Settings** menu.) In the **Challenge** mode, you must determine which player will go first throughout the Tournament.

SCORING

Dragon's Eye Game Points:

PLAYER	ACTION	POINTS
Master	• Slayer must place a tile on the display	+1
	• Either player places a tile on top of another	+10
	• Filling the Dragon Display (Bringing the Dragon to life)	+100
Slayer	• Removing a pair	+2
	• Clearing a Dragon Limb space	+5
	• Clearing a Dragon Heart space	+10
	• Clearing the Display (Slaying the Dragon)	+100

Shanghai II Game Points:

TIME/ACTION	POINTS
30 minutes or less	+1000
30:01 to 60 minutes	+500
60:01 to 90 minutes	+250
90:01 to 120 minutes	+100
Using Shuffle	-100
Using Find a Match	-10

Shanghai scoring is based on time taken in playing. The faster you complete your three layouts, the higher your score. A time penalty is applied for using the **Find a Match** or **Shuffle Remaining Tiles** options on the **Help** menu. Note that in a Tournament game, the players' respective times to finish the three Shanghai layouts in a round are compared to determine the winner. Once the winner in a round is determined, the clocks start at zero again.

In **Challenge** mode, the difference in time between the two players on each Shanghai layout is awarded to the player with the lower time, one point per second. At the beginning of each layout, there is a short pause so that the players can study the board; no matches can be made during this time. All Shanghai games have the **Winnable Layout** option on; players may turn this option off if they wish.

At the end of each round, the players' scores appear after the reward sequence. Bonus points are awarded for an automatic victory in Dragon's Eye.

When you complete the final round in a Tournament game, the game shows your score (or both scores in **Challenge** mode) and the Hall of Fame appears after the final reward sequence. Eligible scores are entered in the Hall of Fame and highlighted.

difficulty of play

In each of the four **Tournament** rounds, the games increase in difficulty. All Tournament games can be played in either **Solitaire** or **Challenge** mode. The order for the Tournament game is as follows—

	ROUND ONE	ROUND TWO	ROUND THREE	ROUND FOUR
Dragon's Eye	• Slayer	• Master	• Slayer	• Master
Shanghai II	• Boar (easy) • Dog (advanced) • Rabbit (master)	• Snake (easy) • Monkey (advanced) • Ox (master)	• Dragon (easy) • Rooster (advanced) • Horse (master)	• Rat (easy) • Ram (advanced) • Tiger (master)

layout construction set

You can create your own layouts, save them, and use them in Shanghai.

getting started

DOS version: Call up the **Construction Set** option from the **File** menu.

Mac version: Call the **Create Layout** option from the **Layout** menu.

Windows version: Call up the **New Layout** option from the **Construction** menu.

A template grid appears on the screen. The grid has eight rows of fifteen spaces. Tiles must be placed within the limits of the grid. You can create layouts up to six layers high.

A number at the upper right corner of the Menu bar tells you how many tiles are left to place. All complete layouts must contain 144 tiles.

placing tiles

To place a tile, select any space on the display with the mouse. A blank tile will appear. You can move this tile around the board by selecting it and dragging it. To drag with the mouse, click on the tile with the **left** button and while holding the button down, move the mouse across the display.

If you drag a selected tile off the edge of the display, it will disappear. If you drag it across a tile already on the display, the dragged tile will be positioned on top of the other tile, up to a maximum of six layers.

You can place a tile directly on top of another tile. Once this tile is placed, you can reposition it as you wish by dragging it.

In the DOS version, you can also place tiles by using a joystick or the keyboard. You can select any space on the display by using the joystick button or by pressing **Enter** when using the keyboard. To drag a tile with the keyboard, move the cursor over the tile with the arrow keys and press the **Space Bar**. The tile will be highlighted. Move the tile around the board with the arrow keys, and press the **Space Bar** (or **Enter**) to place it. The tile will move in half-space increments across the board. Once the tile is in the position you want, release it.

If you decide to remove a tile, select it and drag it off the display. (NOTE: When using the keyboard with the DOS version, select the tile and then press the **Delete** key.)

options

You can reposition all the tiles on the board by using the following keys on the DOS and Windows versions.

DOS	Windows	
-----	---------	--

F4	CTRL-L	Moves the tiles one-half space to the left .
----	--------	---

F5	CTRL-U	Moves the tiles up one-half space.
----	--------	---

F6	CTRL-R	Moves the tiles one-half space to the right .
----	--------	--

F7	CTRL-D	Moves the tiles down one-half space.
----	--------	---

DOS version: You can also select these moves from the **Options** menu.

Mac version: You can also select these moves from the **Manipulate** menu.

Windows version: You can also select these moves from the **Construction** menu.

If you move the tiles beyond the limits of the display, all tiles beyond the limit will disappear.

DOS version: You can turn the background grid on and off by selecting the **Show Grid** option in the **Options** menu or by pressing **F3**.

Mac version: You can turn the background grid on and off by selecting the **Show Grid** option in the **Manipulate** menu.

Windows version: You can turn the background grid on and off by selecting the **Show Grid** option in the **Construction** menu.

player clocks

When a new layout appears, you will see two buttons on the screen which are used for the clocks in the **Challenge** mode. Your new layout must include these buttons. You can select and move these clock buttons with the same procedures used for tiles.

saving and loading layouts

DOS version: Save a layout by selecting **Save** or **Save As** from the **Game** menu.

Mac version: Save a layout by selecting **Save Layout** or **Save Layout As** from the **File** menu.

Windows version: You save a layout by selecting **Save Layout** or **Save Layout As** from the **Construction** menu.

Use **Save** (or **Save Layout**) if you are just starting a new layout or wish to copy over a layout you have altered, and **Save As** (or **Save Layout As**) if you wish to save the layout under a new name. You can save to a hard disk or a floppy disk.

DOS version: To load a layout for further editing, select **Load Layout** from the **File** menu, scroll through the list, and select the layout you wish to work on. To load a layout for play, select **Load Layout** from the **Options** menu and scroll through the list. Find the desired layout and select it. You can play the layout in **Solitaire** or **Challenge** mode.

Mac version: To load a layout for further editing, select **Open Layout** from the **File** menu, scroll through the list, and select the layout you wish to work on. To load a layout for play, select the desired layout from the **Layout** menu. You can play the layout in **Solitaire** or **Challenge** mode.

Windows version: To load a layout for further editing, select **Load Layout** from the **Construction** menu, scroll through the list, and select the layout you wish to work on. To load a layout for play, select **Load Layout** from the **Options** menu and scroll through the list. Find the desired layout and select it. You can play the layout in **Solitaire** or **Challenge** mode.

tile sets

You can play any layout, including your own layouts, with any of the eight tiles sets listed below. It is very easy to make matches with some tile sets (Numbers and Letters, for example) while others are quite challenging. (NOTE: For the DOS version, the tile set illustrations on the following pages represent the tiles displayed in high resolution. Low resolution tiles are not shown.)

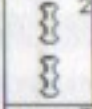

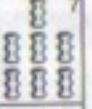

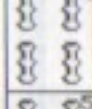

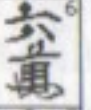

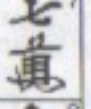

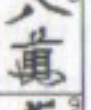

DOS and Windows versions: To change tile sets, select the **Options** menu and then select **Load Tile Set**. You can then select the new tile set by selecting the appropriate name and then the **OK** button.

Mac version: To change tile sets, select the desired tile set from the **Tiles** menu.

Note that if you start a new tile set in the middle of a game, you will automatically start a new game.

playing cards

The Playing Card tile set is used in two variations: **Lo-Hi** and **Hi-Lo**. **Lo-Hi** runs from the ace (as low card) to the nine. **Hi-Lo** runs from the six (as low card) to the ace. There are no unique tiles in the Playing Card set. You can select the variation using the **Load Tile Set** from the Options menu. Spades is shown below — there are four of each tile. (Hearts, Clubs, and Diamonds are not shown.)

the twelve animals of time

In the 61st year of the reign of Emperor Huang Ti, which others call 2637 BC, the aged Emperor introduced a lunar calendar—a calendar which is still in use today in the East. It is measured by a 60-year outer cycle, broken into five inner cycles of twelve years each. Each year begins with the new moon in the time we call Aquarius, sometime in January or February. The 78th outer cycle of the lunar calendar began on February 2, 1984 and will run until January 30th, 2044.

Now in the last year of the life of Siddhartha Gautama, the Buddha, which others place near 483 BC, that holy man called the animals of the earth to come to him, that he might bid them farewell. But of all the animals, only twelve responded to his call. As their reward he named the twelve years of the inner cycles for them in the order that they arrived. First there was the Rat, then the Ox, then the Tiger, the Rabbit, the Dragon, the Snake, the Horse, the Ram, the Monkey, the Rooster, the Dog, and lastly the Boar.

In the centuries since, men and women born during an animal's year have been seen to exhibit the characteristics of that animal. Shanghai players have found insight into humanity by playing layouts based on the animals. Now you have the chance to learn the secrets for yourself...

Rat

The Rat person is always busy, always sociable. He hurries hither and yon, involved in big projects (sometimes too big for his changeable nature). But however his projects turn out, he seems to have all he needs—primarily because he makes efficient use of everything he has. And if he is ever disappointed, he hides it well. He's the one who keeps his head when everyone about him is losing theirs, which is why he's generally at the head of the pack.

February 2, 1984 – February 19, 1985

February 19, 1996 – February 6, 1997

OX

The Ox person is a hard worker—dependable, methodical and tireless. The difficulty comes when you want him to change his course. The Ox lowers his head and goes for the gold—if you're not in his way or even going the other direction, you'll naturally applaud his fortitude and follow where he leads. He has a great respect for system and tradition; he'll get the best out of what's to be had.

February 20, 1985–February 8, 1986

February 7, 1997–January 27, 1998

tiger

The Tiger person is the essence of a king — loaded with power, yet constrained to use it wisely. As a cub he's quite a swashbuckler, dashing off wherever adventure awaits, but as an adult he's content to keep the home fires burning. The world around him enlivens him, wherever he may be, and he in turn, enlivens the world. Just don't forget that he has claws for when he needs them.

RABBIT

YEARS

The Rabbit glides through life because he understands the ways of humanity. This may lead him towards selfless dedication to others, or toward self-indulgence at others' expense, but he always knows what he is doing and why. Sometimes the understanding overwhelms him and he retires to his burrow, but soon he's back out, letting his instincts lead him smoothly through the crowds to all the carrots he can handle.

February 16, 1999 – February 2, 2000

dragon

The Dragon is a mover and a shaker. When compiling the list of famous people for the twelve Animal signs, the Dragon group quickly became twice as large as any other group. Egoistical, eccentric and powerful, these people don't mind letting you know they are better than you — but the thing is, they can back it up. Dragons are feared in Western fables, but in the East, they are revered.

February 17, 1988 – February 5, 1989

February 5, 2000 – January 23, 2001

snake

The Dragon is a mover and a shaker. When compiling the list of famous people for the twelve animal signs, the Dragon group quickly became twice as large as any other group. Famous, eccentric and powerful, these people don't mind letting you know they are better than you—but the thing is, they can back it up. Dragons are feared in Western films, but in the East, they are revered.

The Snake person has great depth within him. Wisdom is his, as is sensuality and intensity — though he may appear on stage, the real life for him is behind closed doors, where he can exercise his powers without explaining them to those who will never understand. Those powers are leading him somewhere, and while others can fail to find their way in life, the Snake must go all the way to his end, whatever it may be.

February 6, 1989 – January 26, 1990
January 24, 2001 – February 11, 2002

horse

The Horse is straightforward making life easy for himself and everyone around him. If he wants something, he just goes and gets it, though often he finds someone else handing it over without asking. He's an adventurer, primarily because he has the strength and endurance needed to take him to far places—and because he can't deny himself the opportunity to make use of his talents.

February 12, 2002 – January 31, 2003

Ram

The Ram is a creative person, looking for ways to enhance the enjoyment of the flock. Not that he'll do anything for the flock—he can be hard-headed if he has to be—but if others are happy then they won't bother him. Because of the harmony he creates, more powerful people take a liking to him and help him in his endeavors, so that in the end, he gets exactly what he wants out of life, without ever pushing anyone around.

February 1, 2003 – January 21, 2004

monkey

The Monkey person uses his mind more than his mass. Like the little animal that clambers around in the treetops, the Monkey person's brain is always in action. He likes pitting himself against others so he can demonstrate his ability to out-manuever them. His biggest problem is knowing when to settle for what he has, as opposed to trying "just one more thing." Or maybe his problem is failing to believe that that is the problem.

ROOSTER

The Rooster seems to be the cock of the walk, but that flair for performance masks a deeply conservative streak. He makes sure that all of his chicks have what they need. He's not nearly as confident as he seems, but he never lets those counting on him know it. He loves to peck away at your life — albeit in a seemingly playful manner, but he does not like having his own feathers ruffled.

dog

The Rooster seems to be the cock of the walk, but that thin for performance masks a deeply consecutive streak. He makes sure that all chicks have what they need. He's not nearly so confident as he seems, but he never lets that counting on him know. He loves to peck away at your life—abstain in a seemingly proper manner, but he does not like having his own feathers ruffled.

There's no real mystery about the Dog person. He's always straightforward, ready to come to the aid of his friends and go for the throat of his enemies. If you betray his trust, he'll let you know about it, but he won't write off the whole relationship. He may become a bit cynical over time, but that's because he had no cynicism at all when he was a pup. But even so, he'll never stop believing that what he does matters.

BOAR

There's no real mystery about the Dog person. He's always straightforward, ready to come to the aid of his friends and go for the throat of his enemies. If you betray his trust, he'll let you know about it, but he won't write off the whole relationship. He may become a bit cynical over time, but that's because he had no cynicism at all when he was a pup. But even so, he'll never stop believing that what he does matters.

The Boar is renowned for his fortitude; once he decides to do something, he perseveres until it's done. Of course, he may have to ignore other considerations and commitments in his quest for results, but he's so natural about it that people he slights rarely hold it against him. He does his best to make it up afterward, and since he doesn't look at anything as a problem he can't overcome, he generally succeeds at that, too.

ACTIVISION 90-day WARRANTY & COPYRIGHT INFORMATION

This software product and the attached instructional materials are sold "AS IS," without warranty as to their performance. The entire risk as to the quality and performance of the computer software program is assumed by the user. However, to the original purchaser, Activision, Inc. warrants the medium on which the program is recorded to be free from defects in materials and faulty workmanship under normal use and service for a period of ninety (90) days from the date of purchase. If during this period a defect on the medium should occur, the medium may be returned to Activision, Inc. or the place of purchase, and Activision, Inc. will replace the medium without charge to you. Your sole and exclusive remedy in the event of a defect is expressly limited to replacement of the medium as provided above. This warranty gives you specific legal rights; you may also have other rights which vary from state to state.

The above warranties for goods are in lieu of all warranties, express, implied or statutory, including, but not limited to any implied warranties of merchantability and fitness for a particular purpose and any other warranty obligation on the part of Activision, Inc. Some states do not allow limitations on how long an implied warranty lasts so that above limitation may not apply to you. In no event shall Activision, Inc. or anyone else who has been involved in the creation and production of this computer software program be liable for indirect, special or consequential damages, such as, but not limited to loss of anticipated profits or benefits resulting from the use of this program, or arising out of any break of this warranty. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation may not apply to you.

After the warranty period, a defective Activision disk may be returned to Activision, Inc. with a check or money order for \$5.00 (U.S. currency) per disk for replacement. Copyright: The enclosed software product is copyrighted and all rights are reserved by Activision, Inc. The distribution and sale of this product are intended for the use of the original purchaser only and for use only on the computer system specified. Lawful users of this program are hereby licensed only to read the program from its medium to memory of a computer solely for the purpose of executing the program. Copying, duplicating, selling or otherwise distributing this product is violation of the law. This manual and all other documentation contained herein are copyrighted and all rights reserved by Activision, Inc. Willful violations of the Copyright Law of the United States can result in civil damages of up to \$50,000 in addition to actual damages, plus criminal penalties of up to one year imprisonment and/or \$10,000 fine.

RETURNS

Certified mail is recommended for returns. For best service, please be sure to:

1. Send only the original product disks (in protective packaging).
2. Include a photocopy of your dated sales receipt.
3. Enclose:
 - a brief note with your name and return address (typed or printed clearly),
 - a description of the problem(s) you have encountered with the software,
 - name of the product,
 - the brand and model name (and/or model number) of your computer.
