

Dynamic Graphics

The Idea Guide to Quick Desktop Success

**Pictorial Index
and Instructions
to use your
Exclusive Charter
Subscriber CD!**

DYNAMIC GRAPHICS, INC.

Welcome

to *Dynamic Graphics Magazine* and your exclusive Charter Subscriber CD! Inside you'll find a variety of TIFF and EPS images from Dynamic Graphics' vast art library (3D art even comes in *Ray Dream Designer* and DXF format); AgfaType fonts (including a special offer); and a terrific supply of ideas and tips...all that you can use right away. To view the art or information, simply click on the appropriate section on the main menu.

Have fun! If you have technical questions about running this disk, please call Dynamic Graphics' Technical Support Team at (800)255-8800, or contact your nearest Dynamic Graphics Representative.

This CD carries a precious cargo of art & ideas!

As our "thank you" for subscribing to *Dynamic Graphics Magazine*, here are more ways to add power to your creative communication using your own desktop computer. Climb aboard, and you'll see!

First stop...easy-to-use images!

Fuel your desktop with a huge selection of full-color and black & white illustrations, photo clips and textures that have millions of uses! We've included images from Dynamic Graphics' art library to give you plenty of subject and style choices. And there's no shortage of color possibilities to save you valuable working time!

Second stop...new 3D art!

Add an exciting touch to your projects with our new 3D images...now also available to those not using 3D programs! They work directly in any page layout or paint program, or just like we did with this train, you can change the view to fit your needs in *Ray Dream Designer* or a DXF-compatible program.

Ride the how-to workshop express!

Learn easy hands-on techniques with our On-Screen Workshops! The interactive tutorials teach you how to integrate art and type, how to use *Photoshop's* airbrush tool to make an ordinary home look really spooky, and more. The One-Minute Workshops show you simple steps to create a burst of power, a neon look, an embossed foil stamp, or a shapely border.

Next stop...original fonts!

You receive two great AgfaType fonts for your unlimited use, right on this CD! Enjoy the commanding style of Ashley Crawford and the calligraphic Quill. And be sure to check out Agfa's exclusive one-time offer of more great fonts at an incredible low price!

Templates keep you on track!

Use the templates from the CD to create some of the projects featured in the premier issue of *Dynamic Graphics Magazine*. You have access to the two- and four-column newsletter & puzzle piece templates.

Build steam with fun & fast filter games!

Here's a neat way to discover more about filters. Learn what filters look like and how to recognize them without spending hours working in programs! You have access to a *PostScript®* Filter Game for *Illustrator* and a *Bitmap* Filter Game for *Photoshop*.

Connect with PIP Printing!

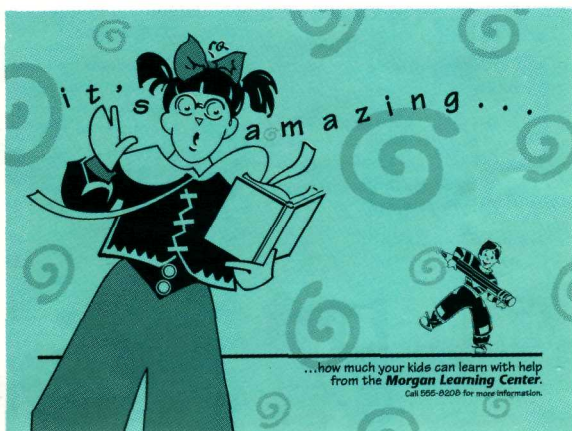

You'll find the express route to finished printing thanks to the *PIPLink™* software that's included on this CD. *PIPLink's* new technology will automatically compress your files, allow you to attach a work order and even choose a PIP location nearest you within the United States. Then, you can modem your work orders for quotes or send files for actual output 24 hours a day!

Check out our other lines!

For a complete tour of Dynamic Graphics' art & idea services, products and publications, roll over "More About Dynamic Graphics" section on the main menu, and on the next menu click on "Dynamic Graphics Products."

**With your new art,
the possibilities go on and on!**

Your new art is so easy to work with. You'll find near-infinite cropping, sizing, placement and color possibilities to create most anything from ads to posters!

To use any of the images:

1) Follow your normal procedure for importing graphics to your page layout, paint, draw or 3D draw program. With *Windows* or *Macintosh*, this requires you to pull down your FILE menu from within a new or existing document. In *Adobe Illustrator*, *Photoshop* or *Macromedia FreeHand*, select OPEN. In *Adobe Pagemaker*, select PLACE. In *QuarkXpress*, select GET PICTURE. In *CorelDRAW!*, select IMPORT. In *Ray Dream Designer* and DXF-compatible programs, select OPEN.

2) From the dialog box that appears, make sure your drive indicates you are selecting from the DG_Magazine CD. Then, click on the "Images" folder.

3) Refer to the number found under each image as shown below to select your desired image. The numbering system gives you additional information about each image:

SAMPLE: 29_DGM.EPS

a) The first two digits are the image number. Any components or additional versions of this image will share the same image number, along with a single alpha character. "T" indicates it is type that corresponds with the main image. "B" indicates it is an extra black & white version of the color image.

b) "DGM" indicates it is the *Dynamic Graphics Magazine* free CD.

c) The last three characters following the period indicate what type of format the image was saved as. All images are either saved as EPS, TIF (for TIFF), RD3 (for *Ray Dream Designer 3*) or DXF (for other 3D programs).

System Requirements

This CD is designed to run on a computer equipped with no less than 6 MB of free or available RAM, a 256 color monitor (640 x 480 pixels) and using no less than a 2x (double speed) CD-ROM drive.

To guarantee the smooth performance of this CD, please make sure you are not connected to a network (*Windows*) or that your file sharing options are turned off (*Macintosh*).
