

IMPORTANT

PRINTING INFORMATION

Adobe Illustrator™ 5.5 contains a variety of printing enhancements and new text features. Opening or printing an Adobe Illustrator 5.5 document with version 5.01 or earlier will cause you to lose many of these enhancements from the document and will reflow any tabbed text. Make sure you and your service bureau use Adobe Illustrator 5.5 to print such documents.

If your service bureau does not have version 5.5, use Adobe Illustrator 5.5 to save a copy of the 5.5 document in EPS format so it can be placed into an earlier version of Adobe Illustrator or another desktop publishing program. You will not lose any of the printing enhancements or tabs in the document when you do this. For more information on printing and tabs, see the Adobe Illustrator Getting Started Guide and the Adobe Illustrator User Guide.
