MORPH

VERSION 2.5

TRANSFORM YOURSELF

Morphing - you've seen the results on television and in the movies and magazines. It looks like magic, but it's magic you can perform yourself, using Gryphon's Morph 2.5.

MORPH MADE EASY

This special effect may look hard, but it's not. And with Morph's Curve tool the program is easier. Instead of using numerous points to control your morph, simply add lines and then reshape them into curves.

WHEN IT'S ALL FINISHED

Create morphs from two still images or two animations. Have fun exaggerating a person's features using the Caricaturing feature. Warping lets you distort a single image or two separate images. We also give you the QuickTime™ movie player so you can view your animations on your desktop.

Once you've created your Morph movies, Morph provides you with a number of options to help display your animations. In addition to playing your Morph movie on your computer in QuickTime, you can turn your movie into a screen saver or you can print any transformation as a flip book.

FAMILIAR FRIEND

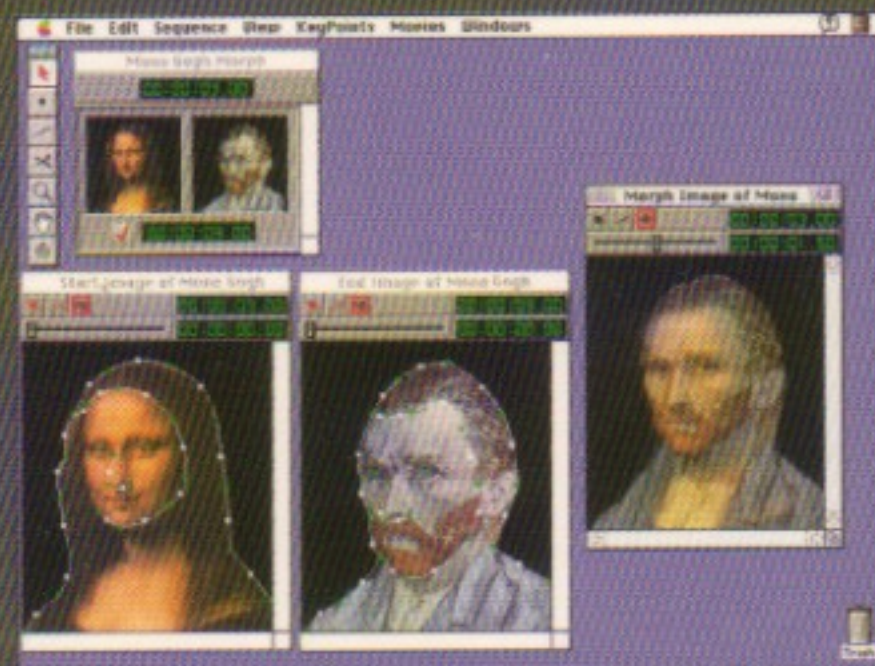

Morph is the original, award-winning software that has received a number of accolades and adorned the front cover of Time Magazine, twice. It is the same program used by video professionals for Hollywood special effects. It has also been embraced by artists, scientists and educators. You too can create morphs at home by just digitizing your own pictures, or using the images we provide with the program.
