

what Dropper?!
what URL?! a4/5 to b1 document converter
whipped up by Noah M.

DO NOT USE WITH DOCUMENTS EARLIER THAN ALPHA 4. THE PROGRAM WILL HANG.
This droplet will ONLY PROCESS what URL?! a4 and a5 documents.

ABSOLUTELY DO NOT OVERWRITE YOUR ORIGINAL DOCUMENTS.
As a safety precaution, always try to convert to a different folder.

If you can't get the drops to be recognized, try rebuilding your desktop.

In writing the droplet, I decided to spend only the time necessary to make it functional, to keep it from interfering with the progress of wU?!. The above limitations are the result.

This droplet is provided only as a convenience, and there is no guarantee or warranty implied.
