AppleLink®

AppleLink CD – your direct source for information about Apple.

AppleLink CD is an information resource product on CD-ROM. It provides regular editions of Apple and third-party product and support information for a single annual subscription fee.

Designed to offer the same easy access to information provided by AppleLink, Apple's global electronic communications and information service, each edition of AppleLink CD features the latest versions of many AppleLink libraries and bulletin boards. Product and program information for Apple and third-party companies is included, along with software upgrades, documentation updates, and product enhancements. You can sample software demos and review new software programs.

Now you can buy a subscription to AppleLink CD for a single annual fee.

Your one-year subscription will bring you four quarterly updates in either a single-user or a multi-user version.

For ordering information, refer to How to Order Apple OnLine Service Products on the back of this brochure.

To use AppleLink CD, you need:

- A Macintosh computer with at least 4 megabytes of RAM
- Macintosh system software version 6.0.7 or later
- A Macintosh-compatible CD-ROM drive
- HyperCard® version 2.1 or later (Version 2.1 is included with AppleLink CD. (Note that localized versions will not work correctly with AppleLink CD.)
- For Kanji users, KanjiTalk™ version 6.0.7 or later

Important: Regardless of the system software you use, you must allow at least 2 megabytes of memory to run HyperCard.

Installation

After making sure that your CD-ROM drive is properly installed according to the manual that came with it, install the AppleLink CD Client and, if necessary, the HyperCard software.

Follow these steps to install both applications on your hard disk drive:

1. Double-click the Installer or the Installer Script Icon in the Installer Folder.
2. After clicking OK in the Installer Script dialog box, follow the instructions.
3. When the installation is complete, click Quit. HyperCard 2.1 and the AppleLink CD Client are now installed on your hard disk drive.
4. Open the HyperCard 2.1 Folder on your hard disk drive. If you are using System 7, drag the HyperCard Fonts file to your System Folder. If you are using System 6.0.x, install the fonts by using the Font/DA Mover.

Important: If HyperCard 2.1 is already installed on your hard disk drive, you don't need to use the Installer; simply drag the AppleLink CD Client stack to your hard disk drive. Then make sure you have 2 megabytes of memory allocated to HyperCard.

For more detailed installation instructions, refer to the easy steps in the AppleLink CD Installation section of the AppleLink CD User's Guide in the AppleLink CD Documentation Folder on this CD.

How to Order Apple OnLine Services Products

- To order a subscription, print out and complete the order form in the Ordering Information file on the CD and mail it to the address on the form. You can also order by calling (408) 974-3309 in the U.S. or refer to the Worldwide Support File in the AppleLink CD Documentation Folder on the AppleLink CD for the appropriate phone number in your country.
- If you need more timely information and electronic-mail capability, you should consider subscribing to Apple's on-line information and communications service, AppleLink. To order, print out and complete the order form in the AppleLink Ordering Information file on this CD and mail it to the address on the form. You can also order by calling (408) 974-3309 in the U.S. or the appropriate phone number in your country found in the Worldwide Support File on this CD.
