Dear Valued ClarisWorks Customer:

You have made an excellent choice in ClarisWorks. It is by far the best selling "works" product for Macintosh. As of January 1993, over a half million users worldwide have found ClarisWorks invaluable to their business, education, or personal needs.

ClarisWorks was designed to set a new standard for integrated software. You will immediately notice the ease with which you can create and edit documents that include a combination of text, spreadsheets or tables, charts, and graphics, all on the same page. This and other breakthroughs in usability are what have made ClarisWorks the top seller in integrated software.

In order for you to get the most use out of ClarisWorks, send in your registration card. Once registered, you will have access to the Claris Connections newsletter, and technical support. In addition, we will include you in mailings about future versions of ClarisWorks.

Once you begin using ClarisWorks, we hope that you will give us your feedback. We are continuously working to improve the product. A "Bright Ideas" suggestions card is enclosed to make it convenient for you to communicate your ideas to us.

Sincerely,

The ClarisWorks Team
