PRODUCT INFORMATION

# Thank You!

Thank you for purchasing our software. We take great pride in our products, and we hope you will benefit from using our hard work to protect your own.

Attached is your registration card. Please fill it out and return it as soon as possible. Returning the card ensures that you receive free technical support and enables us to send you information on new products, features, and updates as they become available.

As your backup requirements grow and change, you may be interested in some of our other products, so I have included a comparison chart to help you select the right solution.

If you have any questions or comments about any of our products, please do not hesitate to call, write, fax or e-mail. I would enjoy hearing from you.

Best regards,

Larry Zulch  
President

## About Dantz...

Dantz Development Corporation has been making quality backup software for Macintosh computers since 1984. Our first products were included with Iomega's Bernoulli Boxes in 1985. In 1987, SuperMac Technology published our first standalone product, DiskFit, which we have since reacquired.

In 1989, Dantz introduced Retrospect which has received numerous awards including the MacUser Eddy and the MacWEEK Target and Diamond awards. (In fact, Retrospect is the only backup software to be presented with any of these coveted awards.)

Dantz products are available at retail and mail order outlets worldwide. Our U.S. distributors are Ingram Micro, Kenfil, and Merisel. Please contact us for information on distributors outside the U.S.
