

June 19, 1995

Dear OptiMem RAM Charger User:

Here's your new *OptiMem RAM Charger Reference Manual*. Sorry for the delay.

I'd also like to announce that we have just finished version 2.1.1 which we are providing free for downloading to all registered users. This update includes the new *OptiMem Settings Wizard* to give interactive hints on improving application settings (p. 29 in the manual), and improved shortcuts for turning OptiMization on and off for applications when they start (p. 25-26 in the manual). It also improves the stability of OptiMized applications on systems with complex system configurations and is now able to automatically OptiMize a wider variety of native applications on Power Macs.

By the way, the first two reviews on OptiMem RAM Charger have been published, and the reviewers love it:

**Macworld (July 1995)** concludes its ☆☆☆☆ rating with: "*The Mac OS ought to work this way already. Until it does, there's OptiMem RAM Charger.*"

**MacWEEK (15 May 1995)** concludes its ◆◆◆◆ rating with: "*OptiMem RAM Charger 2.0.1 is a significant improvement over previous versions, offering much better ease of use, greater control over individual applications' memory parameters and an overall improvement in reliability. ... For those who need to squeeze the most out of their available RAM, whether or not they're running RAM Doubler, OptiMem provides a simple and unobtrusive way to do it.*"

Kind Regards,

Robert W. Thornton, President

P.S. Be sure to download your free update to OptiMem Ram Charger v2.1.1. Locations to download from are listed on p. 39 in the manual, or use your World Wide Web browser to visit <http://www.wp.com/jump>. If you prefer to receive the update on a disk, we will send you one for just a \$4.95 shipping and handling charge. Call 412-681-2692 and charge it to your Visa or MasterCard.
