FilmMaker™

*The Professional Animation/Presentation
Program for the Macintosh*

FilmMaker is the ultimate animation program.
Position, path, rotation, scale, color, and transparency are all animatable in
an environment that provides real-time control and creative flexibility.
FilmMaker does the kind of work that until now meant hours of tedious labor.

Features:

- Import images (PICT, PICS, and EPSF) from graphics and scanning applications.
 - Real-time design of path, rotation, and scale offers creative freedom.
 - Animate color and transparency of objects while they are moving.
- Hierarchical linking of graphics makes elaborate animations fast and easy.
- Compatible with palettes of 2 colors, 256 colors and 16.6 million colors.

Arboreoscience San Francisco © Calif. Academy of Science

*Dramatic animated effects add impact
to presentations.*

*Easy-to-use interactive controls and
Runtime player for the distribution of
Stand-alone presentations.*

*Hierarchical links between graphics and
interactive path description make complex
animations easy to create.*

- Full-screen anti-aliasing of animations for higher image quality and video transfer.
 - Add sound to animations easily.
- Runtime player allows you to distribute your animations.
- Ability to play animations from HyperCard or other X-object environments.

System Requirements and Compatibility

- Macintosh system software version 6.0.5 or greater
- Minimum memory 5 megabytes of RAM
- 32-bit Quickdraw
- Math Coprocessor
- Any Macintosh II family computer with a hard disk
