

FLUENT LASER FONTS™ LIBRARY 2

Mac Disk Directory Sheet

01/14/93

Please Note: Before installing any fonts, see the ReadMe file on Disk 1 and PAGE 5 OF THE MANUAL!

To make installation easier, we have organized the screen fonts by size instead of by name. The Basic Screen Fonts suitcase contains all the fonts we recommend for users running either TrueType or PostScript with Adobe Type Manager (ATM). Therefore, **if you are running TrueType or ATM, we recommend you not install the Additional Screen Fonts.**

We have included Additional Screen Fonts suitcases which contain the larger point size screen fonts for those who desire them. They are provided for people who are not using ATM or TrueType, and wish to have a clearer screen representation at specific sizes like 18 or 24 points. Therefore, **if you are running PostScript *without* ATM, we recommend you install the Basic FLF Screen Fonts and the Additional FLF Screen Fonts.** The Additional Screen Fonts have been broken into 3 files because of their size. Having the larger size fonts installed will not affect printed output.

SCREEN FONTS

Disk 1..... Basic Screen Fonts
Disk 3..... H-N Additional Screen Fonts

Disk 2..... A-G Additional Screen Fonts
Disk 4..... P-Z Additional Screen Fonts

POSTSCRIPT PRINTER FONTS

Disk 5..... Abilene-Campanile PostScript
